

# WALK OFF® MATS

## Anti-fatigue rubber mat

The Anti-fatigue rubber mat is the first mat of its kind, specifically designed for the laundry industry. Manufactured from premium quality nitrile rubber, this unique anti-fatigue construction is water-resistant, resilient to impact and easily cleaned using standard industrial laundry washing processes.

Tested and passed by the American Podiatric Medical Association, this innovative mat has unique cushion and ergonomic properties which reduce fatigue and noise. It is specially designed for safety, comfort and protection in areas where people stand for prolonged periods such as production lines or in shops and bars.

The Anti-fatigue mat is water repellent and stays firmly in place, yet is easy to service. With anti-static properties, and superb oil and solvent resistance, it is also ideal for use as an anti-slip mat in industrial areas.

# Technical Specifications

Product construction	100% nitrile rubber
Sizes in cm (ca.)	84x60, 84x139, 84x297, 119x178
Total weight (ca.)	3100 gms/m <sup>2</sup> - tolerance +/- 5%
Total thickness	8.5 mm
Electrical behaviour	Antistatic and static dissipative
Fire classification	ISO 13501 test, rated E <sub>fl</sub> -s1
Storage	Anti-fatigue mats should be stored flat or rolled
Laundering	Please consult our Processing & Handling Guidelines
Warranty	Please refer to our written guarantee

All specifications are subject to change to meet the ongoing improvements and innovation of our products.

All specifications are according to ISO 9001 Quality certification and ISO 14001 Environmental certification.

Colour: Black
