

WALK OFF® MATS

Heavy Duty Scraper™

Manufactured specifically for heavy duty and outdoor applications, the Heavy Duty Scraper™ mat acts as a tough first line of defence in all weather conditions.

Its hard wearing construction – made of strong solution dyed mono filament yarns – removes excessive dirt and moisture, such as heavy deposits of mud, snow, sand and grit. This unique textile provides a stiff scraping action to capture the heavy dirt particles which the deep pile traps and conceals.

The solution dyed nylon fibres are UV resistant, meaning that they are extremely colourfast – even when regularly exposed to strong sunlight. Rigorous tests simulating the worst possible weather conditions have confirmed the extraordinary durability of this unique product.

Rubber Backing

The Heavy Duty Scraper™ mat is manufactured with our long-lasting nitrile rubber backing based on our most recent innovation in rubber formulation. It is available with Gripper® or flat back.

Customer labelling is available on borders and on the back of the mat.

Technical Specifications

Product construction	100% solution dyed mono filament pile with 100% nitrile rubber backing
Sizes in cm (ca.)	85x150, 85x300, 115x200
Fabric weight (ca.)	800 gms/m ²
Total weight (ca.)	2740 gms/m ²
Pile height	11 mm
Border thickness	2.1 mm
Energy® backing	Allows optimum elimination of water during extraction process (reduces/eliminates drying time)
Fire classification	ISO 13501 test, rated C _f -s1
Laundering	Please consult our Processing & Handling Guidelines
Warranty	Please refer to our written guarantee

All specifications are subject to change to meet the ongoing improvements and innovation of our products.

All specifications are according to ISO 9001 Quality certification and ISO 14001 Environmental certification.

Colour: Grey
